

Paediatrics & Child Health Technology Conference

2-3 December 2026 | Sheffield, UK

In-Person & Online

SPONSORSHIP OPPORTUNITIES

About the Conference

We are delighted to invite you to sponsor the inaugural Paediatrics and Child Health Technology Conference.

The conference will bring together speakers and delegates from across healthcare, industry, academia, charities, and research funders to explore the latest technological advancements, discuss research breakthroughs, and develop interdisciplinary collaborations.

Welcome to the Paediatrics and Child Health Technology - where the future of child health begins and every voice matters.

This hybrid event will take place on Wednesday 2nd and Thursday 3rd December 2026, and will be hosted online and in-person at Sheffield Children's National Centre for Child Health Technology.

Organisers

The conference is being co-organised by the **NIHR HealthTech Research Centre in Paediatrics and Child Health** and the **Royal College of Paediatrics and Child Health**.

The NIHR HealthTech Research Centre (HRC) in Paediatrics and Child Health is a national organisation that aims to transform the health and wellbeing of children, young people, and their families by accelerating the development and adoption of healthcare technologies.

The NIHR HRC in Paediatrics and Child Health team founded the global Child Health Technology (CHT) conference in 2021, with three further, successful conferences held since.

The Royal College of Paediatrics and Child Health (RCPCH) is the professional body for paediatricians in the United Kingdom.

The RCPCH launched the inaugural Digital Paediatrics conference in November 2025 to inspire and empower delegates to harness emerging technologies to drive better outcomes for children's healthcare.

Hosted By Sheffield Children's

The brightest minds in child health technology will join together for the conference at Sheffield Children's world-first National Centre for Child Health Technology.

Sheffield Children's NHS Foundation Trust is a national leader in children's health with an international reputation in world-leading research and innovation, which changes children's lives every single day.

In 2026, Sheffield Children's celebrates 150 years of outstanding care, compassion, and progress. During this milestone year, Sheffield Children's will open the NCCHT to transform children's healthcare through innovation, research, and technology.

The NCCHT will bring together clinicians, researchers, industry partners, and around 200 patients a day to co-create new technologies - developed with and for children.

This unique environment will accelerate the design, testing, and adoption of safe and effective child-focussed health technologies, and bring new ideas into children's healthcare to change lives and improve how we deliver care.

The NCCHT is based at the Sheffield Olympic Legacy Park - a thriving ecosystem of world-class sport, education, research, and innovation helping to change children's lives every day.

The conference offers an exciting chance to visit the NCCHT and discover more about the world-class facilities and opportunities available.

Why Sponsor?

Join us for two days as professionals from healthcare, academia, and industry come together to discuss unmet needs in paediatric healthcare, present cutting edge research, and share novel technologies.

Come and share your organisation with our expert and dedicated in-person and online audience.

There are a range of sponsorship packages available, including in-person and virtual options. Please contact our team to discuss.

Associate your brand with leading NHS organisations in paediatric healthcare

Boost brand visibility among a multidisciplinary audience

Network and connect with delegates

Welcome to the Conference

“The Child Health Technology (CHT) conference has been the UK’s leading forum for showcasing cutting-edge innovation in paediatric care, bringing together clinicians, researchers, industry partners, and patients to explore how emerging technologies can transform outcomes for children and young people.

“Each year has pushed the boundaries further, from early digital prototypes to real-world deployments of AI, remote monitoring, digital therapeutics, and immersive technologies, creating a uniquely collaborative space where ideas move rapidly from concept to clinical impact.

“CHT embodies the sector’s growing maturity and the increasing expectation that technology should be co-designed with families, evidence-driven, and meaningfully embedded in everyday paediatric practice.

“In parallel, the RCPCH Digital Paediatrics conference has become a cornerstone event for paediatricians navigating the fast-evolving digital landscape, offering practical insights into data, interoperability, safety, governance, and the realities of implementing digital tools across diverse clinical settings. Its focus on standards, equity, and clinical leadership has shaped national conversations about what good looks like in digital child health.

“Bringing these two communities together for a joint two-day event in December 2026 creates an unprecedented opportunity: a single platform where visionary innovation meets clinical rigour, where emerging technologies are tested against real-world needs, and where the future of digital paediatrics can be shaped collectively by those who deliver care and those who experience it.”

Professor Paul Dimitri

Director, *NIHR HRC in Paediatrics and Child Health*

Vice President for Science and Research, *Royal College of Paediatrics and Child Health*

Founder, *Child Health Technology Conference*

Clinical Director of Innovation and Child Health

Technology, *Sheffield Children’s NHS Foundation Trust*

“The RCPCH’s Digital Paediatrics programme, including the successful Digital Paediatrics Conference 2025, was designed in response to our Members. Our 2024 membership survey was one channel through which we clearly heard how our members needed more support in what continues to be a rapidly changing sector.

“Many of our 25,000 members are keen to actively use technology to transform child health and embrace the shift from analogue to digital. Equally, many are also cautious about these new opportunities; which are best suited to their needs and the needs of their patients?”

“In 2026 we’re bringing together the world-leading expertise of the NIHR HRC in Paediatrics and Child Health & the RCPCH, and their stakeholders, to provide a first of its kind, sector-wide perspective on the child health technology landscape of tomorrow.

“The Paediatrics and Child Health Technology Conference 2026 will bring clarity, energy, and best practice guidance to all interested stakeholders and, in so doing, accelerate the adoption of new, efficacious, cost-effective, and safe innovations across the child health landscape. This will significantly benefit children and young people and the healthcare professionals who support them in the short, medium, and long terms.”

Professor Steve Turner

President, *Royal College of Paediatrics and Child Health*
